Weill Cornell Medical College

Dear Program Participant,

On behalf of the Department of Ophthalmology and the Weill Cornell Medical College (WCMC) Ophthalmology Alumni Association, we are pleased to welcome you to our annual Alumni Day . This year's program will be highlighted by the presentation of the 38th annual John Milton McLean Award to Richard D. Lisman, MD.

Alumni Day is a reminder of our department's continued tradition of training future ophthalmologists and vision researchers and the importance of keeping these alumni connected to the Department and to each other. Alumni consists of all current and previous WCMC Department of Ophthalmology faculty and graduates of the residency and fellowship (research and clinical) programs. All alumni are encouraged to remain involved.

The Alumni Association's mission is to support the Department's commitment to teaching, research, clinical care, and public service. The steering committee consists of both current faculty and previous graduates of the program who continue to be actively involved with resident and fellow education. Throughout the year, all interested alumni are notified by email of the grand rounds schedule, special lectures, annual alumni events, fellow and resident graduation invitations, and departmental updates.

We are delighted that you are able to join us this year, and we look forward to your continued support of the department and our current and future alumni. If you would like to be more involved in the Alumni Association, please contact us at (ophthoprograms@med.cornell.edu) for more information.

Sincerely,

Peter M. Odell, M.D.
President, Weill Cornell Ophthalmology Alumni Association

Richard D. Lisan, M.D.

John Milton McLean, MD

John Milton McLean was Professor and Chairman of the Division of Ophthalmology at The New York Hospital-Cornell University Medical College from 1939 to 1968. He initiated the residency training program at The New York Hospital with a combined full time and voluntary staff.

Among notable departmental achievements during this period were the establishment of the first Eye Bank (later moved to Manhattan Eye, Ear and Throat Hospital), the introduction of steroids in the treatment of ophthalmic disease as well as cryopexy and numerous other innovations in the treatment of retinal disease.

Dr. McLean was universally recognized as one of the leading educators of his era. The John Milton McLean Chair for the Department of Ophthalmology was established in 1979 and grateful patients and alumni established the McLean Medal in 1981. It is awarded annually by the alumni to an ophthalmologist who has made significant contributions in teaching, research and clinical practice.
